

Duane J. Taylor MD changing lives for patients with sinusitis with new in-office procedure called XprESS™ XprESS

October 11, 2011, 2011 – Duane J. Taylor M.D., located in Bethesda, Maryland is changing the way sinusitis is treated by dramatically and instantly improving patient's lives with a new in-office procedure. This innovation in the treatment of debilitating sinusitis symptoms is called a balloon sinus dilation procedure that is so simple and quick it can be done in the physician's office.

XprESS is effective for treating patients diagnosed with recurrent or persistent sinusitis, a disease that impacts more than 35 million Americans annually. Performed under local anesthesia, balloon sinus dilation is a quick procedure that opens blocked sinus pathways by inserting and inflating a small balloon, which restores drainage and offers instant life-changing relief that lasts.

“We are very excited to offer the XprESS treatment and improve the lives of our patients so quickly and dramatically,” said Dr. Duane Taylor of Le Visage ENT & Facial Plastic Surgery. “We’ve treated many patients with XprESS in our office. Our patients are relieved of their symptoms immediately after the procedure and many are back to their normal routine the next day.”

To find out if this balloon sinus dilation procedure is right for you, or to learn more about our services, please visit www.levisageface.com or call us at 301-897-5858.
