Dr. Duane Taylor has 20 years experience helping people feel confident when they look in the mirror.

“Our patients are well informed and comfortable before any surgical procedures,” says Dr. Taylor, who was trained in facial plastic and reconstructive surgery by internationally renowned plastic surgeon Clyde Litton MD, DDS.

Dr. Taylor uses the latest surgical techniques in performing rhinoplasty, upper and lower eyelid reshaping, ear repositioning, face and neck lifts, liposuction and facial implants. He also performs minimally invasive office treatments such as microdermabrasion, facial filler injections, as well as Botox and Dysport injections.

And Dr. Taylor’s procedures come with an added benefit. He is also a board certified ear, nose and throat surgeon, so when he improves the shape of a patient’s nose, he can make sure they breathe more comfortably as well!
